

Hi John,

The trees seem to like it out here in hood river. Most are doing very well. There are ten trees that didn't make it, but one of them was a free-bee that you gave us to try so we only have nine that need replacements. I think we ended up getting about 80 trees so this seems like a good ratio to me. In addition I would love another batch this year. When you have 5 acres it is amazing how quickly you run out of trees! I have copied all the information from your form into this email, but I would be happy to fill out the form and mail in a hard copy if that is easier for you.

I have also attached a couple of pictures of the trees. Let me know if you need more. The trees were of excellent quality, picking them up went smoothly, and some have grown as much as 10-12 inches in just their first season in the ground. I am looking forward to more trees this year! You are providing an excellent services and it is a pleasure to be a part of nurturing many vibrant new trees.

Next years request:

20 5-6' Douglas fir, B&B

10 5-6' Norway spruce, B&B

20 5-6' Nordman fir, B&B

20 5-6' Deodora Cedar, B&B

10 4-5' Norway spruce, container

10 4-5' Colorado spruce, B&B (or 3-5' container)

10 4-5' Serbian spruce, container

total = 100 trees
